

## How to Export an Android Studio Project

In order to submit your labs and project deliverables, you will need to export the Android Studio app to a zip file. You will then need to submit the zip file on Brightspace.

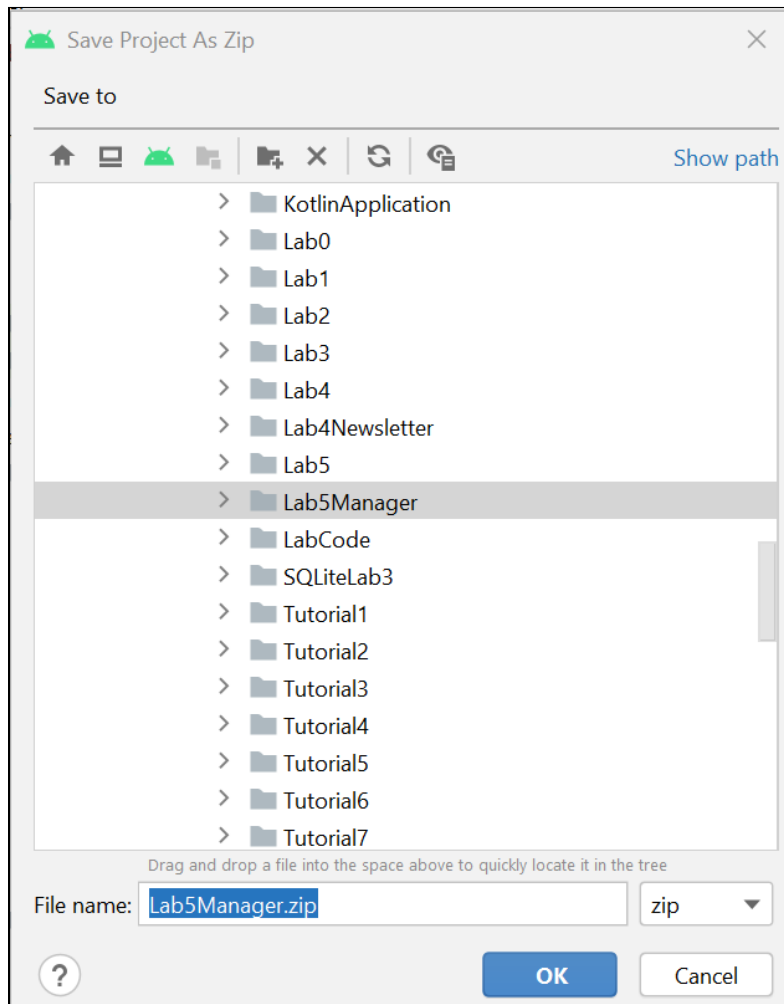

Note: these screenshots were taken on a Windows system. Steps may look slightly different on a different device.

### Directions:

1. Select the File tab on the top left corner -> Export -> Export to Zip File...

2. Choose the destination folder and name of the zip file in the modal window that appears.

3. Submit your zip file on Brightspace under the "Assignments" tab before the due date. Feel free to leave any comments you have for the TA under the "Comments" section when submitting.
